

ACFA Carvè

Features & Benefits

For Exterior Applications – Façades & Architectural Screening

- **Thicker & stronger profile** (15mm and above) supports deep carving, engraving, and perforated screening.
- **Ready-to-carve surface** allows architects to create **signature façades** with dimensional patterns and bold visual identity.
- **Durable & weather resistant** – engineered to withstand UV, rain, heat, and environmental stress.
- **Sustainable alternative** to conventional cladding, with fire resistance, termite resistance, and low maintenance needs.
- **Screening & shading options** – decorative perforations can enhance **ventilation, shading, and privacy**, while elevating design aesthetics.

For Interior Applications – Decorative Walls & Partitions

- **Time-saving installation** – instead of building brick walls and finishing them later, ACFA Craft can be installed as **a partition wall that's already decorative**.
- **CNC-carved and patterned surfaces** bring walls to life instantly, with no need for separate finishing layers.
- **Versatile design potential** – from flowing organic motifs to bold geometric reliefs, each board becomes a design element on its own.
- **Lightweight yet strong**, making it easier to install compared to traditional masonry.
- **Finishing-ready** – primed for paint, textured coatings, or left natural for a raw, architectural aesthetic.

Key Technical Advantages

- High-density fiber cement core for carving precision
- Supports CNC engraving, perforation, and textured surface design
- Resistant to fire, moisture, termites, and impact
- Suitable for indoor and outdoor use
- Available in multiple thicknesses and standard sizes
- Compatible with premium finishing systems (Jotun, Al Jazeera, acrylics, textured coatings)

Creative Applications

Sculptural exterior façades

Decorative wall cladding

Architectural screening & shading panels

Retail, hospitality, and branded environments

Partitions & feature walls with ready-made decorative surfaces

Finish Options

- **Natural Sanded Finish** – minimalist, raw surface appeal
- **Primed Surface** – ready for custom painting or coating
- **Exterior Weather-Resistant Paint** (elastomeric systems)
- **Interior Acrylic Paint** – for smooth decorative walls
- **Textured Coatings** – for enhanced depth and richness

Why Choose ACFA Craft?

- **Saves Time & Effort** – replaces brick + plaster + decorative finishing with one ready-to-carve, decorative partition solution
- **Adds Architectural Value** – transforms flat walls into signature design features
- **Built to Last** – weather, fire, and impact resistant for long-term performance
- **Unlimited Creativity** – supports custom carving, branding, and artistic surfaces
- **One Material, Endless Possibilities** – from façades to partitions, inside and out
